

## S e r v i c e s

I provide a blend of consultancy and development services for Web designers and agencies, online start-ups, and businesses seeking to establish a compelling and effective online presence.

**Click each service for more information.**

### Consultancy

I can act in a consultative and practical capacity to help you:

- with requirements analysis
- respond to RFP documents, or prepare your own and evaluate responses
- produce functional specifications
- design your solution architecture
- interview and evaluate prospective technical recruitment candidates

### Development

I have extensive development experience and can work independently or as part of a team to help you:

- design and develop bespoke web, intranet, and extranet applications
- add ecommerce functionality to your web site
- develop bespoke content management systems, or leverage existing solutions
- implement a blogging solution
- design, develop, and consume web services
- tailor for .mobi and the mobile Internet
- leverage public API platforms e.g. Google Maps, FaceBook, Twitter

### My Technology A-Z

- Microsoft.NET Framework w/ C#, ASP.NET, ASP.NET MVC, ADO.NET, SubSonic
- Ruby on Rails, Java, PHP, ASP
- (X)HTML, CSS, Java/ECMAScript, Ajax, RSS, Atom
- XML, XSL, XPath
- Microsoft SQL Server, MySQL

Rest assured, I'll always recommend the most appropriate technologies for your project.

### Web Standards & Accessibility

As a veteran practitioner of web standards and web accessibility I can help you:

- audit your web site for issues
- produce best-practice XHTML and CSS templates
- address your web accessibility & usability issues
- train production staff in best-practice approaches
