Clients

"Whether it's been providing wired, wireless, web hosting, web-design services, or general tech support, USAi.net has always been responsive, and especially appreciated in those "emergency" situations. More than once I can recall when you...showed up at our facilities when our internet service was "out of business" because of Verizon or internal hardware problem! You guys never failed to get us going within an hour or two by correcting the problem or getting us a wireless connection to get back in business."

- Rich Cooper, Director of Warehousing Services

"USAi.net has powered the Internet connection at the Boston Public Library since 2005 with both wired and wireless Internet connectivity. Boston Public Library trusts USAi.net for both wired DS3 and Wireless OC3 connectivity for the main branch at Copley Sq. as well as 5 mb wireless connections at 27 branch locations scattered across the city. The Library considers connectivity at all locations to be a mission critical service to the city of Boston."

"ARC Technologies has been using USAi.net for more than five years, and we have been very happy with them. Our wireless Internet connection offers consistent performance and excellent reliability. Technical support is easy to reach, willing and able to help, and extremely responsive. No run around, no recordings, no help desk seven states away. If trouble does occur, we at least know what and why and when. That's something you just won't get from the giant telephone and cable companies."

- Ben Scott, Systems Admin

"Boston Main Streets has been partnering with USAi.net for the past two years, and we have been impressed by their professionalism and responsiveness to our unusual needs in bringing wireless to Boston's neighborhoods. USAi.net is more than a vendor, they are a partner."

- Brian Goodman

"USAi.net has consistently provided superior solutions for our constantly changing needs along with the highest levels of customer service. USAi.net is one of our most valuable partners."

- Todd Ficarra (System Administrator, Bay State College)
